

OSP Redondo ITI Study Club, Trent Westernoff, Director

Digital Impression and Digital Treatment Planning

Learning Objectives

- Understanding how IOS will quickly provide clinical information to surgical/restorative/laboratory partners.
- “Seeing” the desired result and planning implant placement to support this result.
- How IOS at the time of surgery can set up restorative success.
- Understanding the advantage and limitations of the digital approach.
- Creating the WOW factor to help motivate patients and set expectations.

Course Description

The landscape of dentistry is rapidly changing with the widespread adaptation of intra-oral scanning (IOS) and digital dentistry. Nowhere is this more evident than in implant dentistry. Utilizing current digital technology can improve communication on all levels, between patient and clinician as well as between restorative and surgical colleagues. With improved communication, complex dental treatment can become predictable for both clinician and patient. This event will provide a foundation of how to use current IOS technology to set expectations for predictable results as well as present scientific evidence regarding the accuracy, reproducibility, and cost effectiveness of the digital approach in implant dentistry.

Course Information

Speakers	Dr. Trent Westernoff & Summer Chung
Date	April 16, 2024
Time	Registration: 5:30 p.m. Program: 6:00 p.m. to 8:00 p.m.
Location	Dr Trotters Office 1706 S Elena Ave Redondo Beach, CA 90277
Audience	All
AGD Code	690
Type	Lecture
SAC	Straightttforward
CE Credit	2.0 Hours
RSVP	Please RSVP by 04/10/24 to Osaka at oralsurgerypartnerspr@gmail.com
Phone:	310-227-3434

Speaker Biographies

Dr. Trent Westernoff is a board-certified oral and maxillofacial surgeon with seven years of extensive surgical experience. He graduated with honors when he received his bachelor's degree at the University of California, Santa Barbara in 1994. In 1998, Dr. Westernoff completed his post-graduate degree, obtaining a doctorate in Dental Medicine at the Harvard School of Dental Medicine, with cum laude honors. During dental school, he became a US Army reservist and was commissioned as a captain on the USS Constitution.

Wanting to pursue a profession in oral and maxillofacial surgery, Dr. Westernoff continued his education at the University of California, San Francisco (UCSF) residency program and the UCSF School of Medicine. During his six years at UCSF, he completed oral maxillofacial surgery training, obtained his medical degree (MD) and finished a year of general surgery training. In addition to his extensive education, Dr. Westernoff was activated and promoted to the rank of major in the US Army where he served for three years as full-time hospital staff at William Beaumont Army Medical Center. While there, he practiced full-scope oral and maxillofacial surgery. He was deployed in 2005 during Operation Iraqi Freedom and served at a Combat Support Hospital in Mosul, Iraq. Dr. Westernoff received a Meritorious Service Medal for his outstanding service while in Iraq.

Dr. Westernoff completed board certification for both the American Board of Oral and Maxillofacial Surgery and National Dental Board of Anesthesiology, and he currently holds diplomate status in both organizations.

After completing nine years in the US Army Ready Reserve and three years of active duty, Dr. Westernoff and his wife elected to move back home to Southern California, where they are raising their family and continuing their professional careers.

Registration Policy

- Registrations are taken on a first come, first serve basis

ITI reserves the right to cancel courses that do not meet minimum enrollment. The course fee will be refunded, in full, within two weeks of cancelled course date. Attendance is not confirmed until attendee has received a letter of confirmation from the ITI Education Department.
