

Seoul National University, School of Dentistry

Department of Oral & Maxillofacial Surgery

About the Scholarship Center

Seoul National University (SNU) School of Dentistry began as Kyeongseong Dental School in 1922. It was the first educational facilities for dentistry in Korea and became one of the most prestigious schools in Korea today. We pursue excellence in education, research, care and service by training world-class life scientists and dentists; who are not simply knowledgeable leaders of medical sciences but also leaders who forego their own interests for the common good and stand up to safeguard the human health.

The Department of Oral and Maxillofacial Surgery at SNUDH has 8 professors. We provide professional treatment for various out- and inpatient surgeries in areas including dental implantology, prevention and treatment of oral cancer, oral and maxillofacial reconstruction, treatment for malformation, traumatology, cleft lip and palate, TMD, salivary gland diseases, and other pathologies in the head and neck region. We operate with about 40 beds, 4 major operating rooms, 7 outpatient operating rooms, recovery rooms, and intensive care units.

Our Dental Implant Center, embodies excellence in smile restoration. Our facility has seven dedicated operating rooms exclusively for pre-prosthetic and implant procedures and minor oral surgeries. Each room is equipped with the latest tools, facilitating precise examinations, accurate diagnoses, and digital guide surgeries. A synergy of prosthodontics, periodontics, and oral-maxillofacial specialists ensures the provision of exceptional care.

Seoul National University Gwanak Dental Hospital (SNUGDH) is a branch of SNUDH.
